SUMMARY

Computer Science Engineering student with hands-on experience in web development, backend development, and database-driven applications. Skilled in C++, Python, JavaScript, React.js, FastAPI, PHP, Node.js, Express.js, MySQL, and MongoDB. Built and deployed practical projects involving resume analysis, newsletter management, URL shortening, OTP verification, REST APIs, and database operations. Focused on writing clean code, improving user experience, debugging errors, and building practical solutions with a strong foundation in Data Structures and Algorithms.

EDUCATION

B.Tech in Computer Science and Engineering	SKIT Jaipur, Rajasthan	2024 - 2028	CGPA till 2nd Sem: 7.9
Senior Secondary (Class 12)	Herbert Sr. Sec. School, Kota - RBSE	2024	81.4%
Secondary (Class 10)	St. Joseph's Hitech Gurukul School, Kota - CBSE	2022	72.4%

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript | **Frontend:** HTML, CSS, JavaScript, Bootstrap, React.js | **Backend:** FastAPI, PHP, Node.js, Express.js, REST APIs | **Database:** MySQL, MongoDB | **Tools and Platforms:** Git, GitHub, VS Code, Postman, Render, Vercel | **Core Subjects:** Data Structures and Algorithms, DBMS, OOPs, Computer Networks

WORK EXPERIENCE

Web Development Intern - Kestechno Software | 15 Days

- Learned and practiced fundamentals of web development using HTML, CSS, JavaScript, PHP, Bootstrap, and MySQL.
- Worked on building dynamic web pages, form handling, database connectivity, and backend logic using PHP and MySQL.
- Developed a Newsletter System project using the same technologies, including subscription flow, user data storage, admin-side management, and email-based functionality.
- Improved understanding of complete web application flow from frontend design and form validation to backend processing and database storage.
- Practiced Bootstrap layouts, CRUD-style database operations, code organization, and testing of user input flows.

PROJECTS

Resume Analyzer | React.js, FastAPI, Python

- Built an AI-based resume analyzer that accepts PDF/DOCX resumes, extracts content, detects skills, and provides ATS-style improvement suggestions.
- Connected a clean React frontend with FastAPI backend APIs to generate structured resume analysis and feedback for users.
- Focused on practical ATS-friendly output, clear result display, and easy-to-use upload flow for students and job applicants.
- Handled file validation, response formatting, and backend integration to make the project usable as a resume improvement tool.

Newsletter System | HTML, CSS, JavaScript, Bootstrap, PHP, MySQL, PHPMailer

- Developed a newsletter subscription system with OTP-based email verification, unsubscribe flow, and subscriber management features.
- Created an admin panel to view subscribers, delete users, manage stored data, and send messages to all verified subscribers.
- Implemented database-backed subscriber records and PHPMailer-based email delivery to make the system useful in real-world scenarios.
- Designed a simple user interface and connected frontend forms with backend scripts for complete subscription management.

URL Shortener | Node.js, Express.js, MongoDB

- Built a URL shortener that converts long URLs into short links, stores generated links in MongoDB, and redirects users efficiently.
- Created backend APIs for link generation, storage, and redirection with a simple frontend interface for user input.
- Practiced REST API structure, MongoDB connectivity, error handling, and deployment-oriented project organization.
- Focused on simple user experience, reliable redirection, and clean separation between frontend files, API logic, and database models.

CODING EXPERIENCE

- Solved multiple programming problems on various coding platforms, including competitive programming and DSA-based practice to improve logic building, debugging, and algorithmic thinking.
- Practiced topics such as arrays, strings, binary search, two pointers, recursion, sorting, hashing, and basic dynamic programming.
- Used regular practice to strengthen problem analysis, dry running, edge-case handling, and optimized solution building.
- Codolio: [Profile Link](#)

ACHIEVEMENTS

- Selected as GSSoC Contributor and gained exposure to open-source contribution workflows.
- Participated in Smart India Hackathon (SIH) 2025 and received a participation certificate.
- Participated in LMN Hacks 8.0 at LNMIIT and worked in a hackathon-based project environment.
- Completed multiple web development and backend projects with deployment experience on modern platforms.
- Continuously improving programming fundamentals through project building, debugging, and regular problem-solving practice.

CERTIFICATIONS

- Programming in Modern C++ - NPTEL: strengthened C++ fundamentals and programming concepts.
- Problem Solving Through Programming in C - NPTEL: practiced logic building, loops, functions, and basic programming techniques.
- Smart India Hackathon 2025 - Participation Certificate
- LMN Hacks 8.0, LNMIIT - Participation Certificate
